📁 Projects

Portfolio [↗](#)

Modern Portfolio Website – Built a fully responsive, portfolio using **Next.js, TypeScript, Tailwind CSS, and Framer Motion**. Implemented server-side rendering (SSR) for performance, SEO optimization, smooth animations, and integrated a contact form with API and email notifications.

kemet mechanical services

Kemet Mechanical Services – Developed a fully responsive corporate website for a mechanical services company using **React** for the frontend and **Node.js with Express** for the backend. Focused on performance, SEO optimization, and delivering a clean, user-friendly interface to present services effectively.

Connect Hub

Developed a social media backend using Node.js, Express.js, and MongoDB with features including authentication, user management, posts, likes, comments, friends, messaging, notifications, and media handling.

Santawy Wear

Developed a Node.js + Express.js backend for an e-commerce clothing store with MongoDB, JWT authentication, admin panel, CRUD APIs, and payment integration.

Notes

Developed a notes management backend using Node.js, Express.js, and MongoDB, featuring user authentication and CRUD operations for notes.

Shopsy

Developed a modern e-commerce frontend using React, Vite, and Tailwind CSS, featuring responsive design, product carousels, and interactive UI components.

Udemy

Udemy is a web-based platform that I developed to showcase online courses. The application was built using HTML, CSS, and JavaScript,

Dayma

Dayma is a web-based application that I developed to showcase food products. The application was built using HTML, CSS,

Type-N-Speak

Type-N-Speak is a voice-controlled typing application that I developed. The application allows users to control the rate and pitch.

React Calculator

This calculator was built using React and allows you to perform basic arithmetic operations like addition, subtraction, multiplication,

Watched

The application was built using HTML, CSS, and JavaScript. I also utilized external APIs to retrieve movie data and integrated responsive design to ensure that the application is optimized for all screen sizes.

Clothing-shopping

Clothing-shopping is a web-based application that I developed to showcase products. The application was built using HTML, CSS,
